#### Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

#### Individual protection measures, such as personal protective equipment

| General information:                | Good general ventilation (typically 10 air changes per hour) should be used.<br>Ventilation rates should be matched to conditions. Supplementary local<br>exhaust ventilation, closed systems, or respiratory and eye protection may<br>be needed in special circumstances, such as poorly ventilated spaces,<br>heating, evaporation of liquids from large surfaces, spraying of mists,<br>mechanical generation of dusts, drying of solids, etc. |
|-------------------------------------|--|
| Eye/face protection:                | Wear safety glasses with side shields (or goggles).  |
| Skin Protection<br>Hand Protection: | Use suitable protective gloves if risk of skin contact.  |
| Other:                              | Wear suitable protective clothing.   |
| Respiratory Protection:             | In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.  |
| Hygiene measures:                   | Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use.  |
